**AdVenture Communist: A Twist on the Mobile Game Classic with a Communism Parody** The makers of AdVenture Capitalist are back with a new game that offers a similar experience but with a twist. AdVenture Communist is an idle clicker game where you play as the "glorious leader" of your own Communist state, gathering resources and optimizing production to rank up quickly. The game promises to be everything you've ever wanted in a communism simulator. While fans of idle clickers like AdVenture Capitalist may know how things work, there are several new twists beyond the communism theme and features that set it apart from its capitalist predecessor. To help players earn currency and unlock new products faster, here are 10 tips and tricks for AdVenture Communist.

- 1. Less Tapping, More Holding** The game focuses on the "idle" half of "idle clicker." Instead of tapping to earn resources, tap-and-hold on the green resource button to simplify earning resources.
- 2. Comrades as Main Currency** In this game, comrades are your primary currency and basis for ranking up. They're automatically generated by the game and increase in number as you rank up and complete missions.
- 3. What Are Missions?** Missions are like quests that can be completed by playing the game normally. Examples include buying a certain number of Potatoes, Farmers, or Communes to progress.
- 4. Utilize The Communist Lingo** The game's communist theme means using phrases like "Comrade" and understanding the ranking system, which may seem complex but is actually quite straightforward.
- 5. Optimize Resource Allocation** As you rank up, optimize resource allocation to get more resources per second, which will help you progress faster in the game.
- 6. Focus On The Bottom Right Corner** The bottom right corner of the screen has a green button that can be tapped-and-held to earn resources quickly.
- 7. Use The Auto-Upgrade Feature Wisely** Use the auto-upgrade feature wisely by waiting until it takes less than three seconds for new resources to be created automatically, allowing you to focus on other parts of the game.
- 8. Build Up Your Production Line** Building up your production line is key to earning more resources and ranking up quickly in the game.
- 9. Keep An Eye On Your Resources** Keep an eye on your resources at all times to avoid running out of anything important.
- 10. Experiment And Adapt** Experiment with different strategies and adapt them to what works best for you as you progress through the game.

Given article text here Watching commercials will give you a temporary boost in production for all industries. In this game, you have to watch ads because they help speed up the production rate of certain industries and sometimes increase your income while being offline. To activate these boosts, tap on the TV icon on the upper right side of the screen. If you want to get more boosts, keep watching videos until the initial boost period ends. Potatoes enlist millions of Farmers and others to boost production. Medals can be earned organically, but rewards, including points for Science research, make them more appealing. These points can be invested in technologies that amplify production boosts, although they may be challenging to obtain. Research is crucial as it allows you to study technologies that carry over to future playthroughs even after prestiging. However, meeting medal requirements takes time, and patients are rewarded with Science points. Alternatively, players can opt for in-game purchases or real-money transactions for instant gratification. When spending Science points, it's recommended to save them for higher-end industries like Weapons and Medicine rather than using them immediately. This strategy ensures a smoother experience as the game progresses. Players should also take advantage of the percentage options on the screen, which allow them to buy resources in bulk or manage purchases more efficiently. Earning free gold is challenging, but it's essential for buying special power-ups that accelerate resource production. These power-ups include Button Auto-Tap, which automatically taps resource buttons, and Proper-Ganda, which increases all resource production by 5x. We've observed that there are two primary methods for earning gold in the game: purchasing a starter package or gold bar-only bundles from the shop, or clicking on the gold bar button to access offer walls. While buying more expensive packages may provide better value, it's generally recommended to opt for mid-range options when spending real-world cash. Completing offers for free is often a more desirable option than purchasing premium currency. In terms of progression, the best time to prestige and reset your game is when you've reached a plateau and are struggling to unlock new resources at a normal pace. This allows you to benefit from advanced science and increased science points awarded via medals, giving you an advantage in future playthroughs.
