Development Meyer says the idea of twilight arose in a dream in 2003. June 2 He dreamed of a human girlfriend and a vampire who loved him, but still wanted his blood. Inspired by his dream, Meyer has now written a project about the beginning of book 13.[21] The first drafts called forks, not twilight; The publisher wanted to change the name. Initially, Meyer did not call her two main characters. She chose Edward Rocher, drunk from Jane Air Charlotte Bronte and Edward Ferrara, with the emotion and feeling of Jane Austin. The main woman Called Isabella, thinking she would choose her for the girl. Rosalie and Jasper originally named Carol and Ronald.[22] Meyer continued to write for the final chronology without worrying about the background. Instead of warning them up, she wrote a chapter. Chapter 13. E. when the last chapter of the first project became more and more he wrote epilogue after epilogue. However, he wanted to explore the many events in the background and the causes of the events in the chapters. realized, so he plans to write a background of 5 to 6. [25] Completed the article in 2003. 29 August [26] His sister liked the book and urged Meyer to send the manuscript to literary agencies. [27] Of 15 lettersThe five remained unanswered, nine were rejected as a result, and the last writers' house received a positive response from Jodi Reamer. [28] Meyer sent letters to literary agents who asked if they were interested in 130,000 words for new vampires. Success helped. An inexperienced writer's home assistant answered his question without knowing that new adult books should be 40,000 to 60,000 words. [29] Due to this error, Reamer finally read Meyer's draft and signed it as a customer. [29] During the regulation process, the section was 20, the section was cut from the manuscript with Emmet's statement of Lac's attack and some parts of Sonsözöz.

Cover Stephen Meyer, forbidden fruits in the apple book on the cover, and Bella and Edward represent the forbidden love, he said. Creation at the beginning of the book uses a fragment of 2: 17. Excellent: Edward's portrayal of the terrible tragic hero is too Byronic, and Bella's appeal is more Charming character, but the depiction of dangerous lovers immediately catches the eye, fans of dark romance will find it hard to resist st. [49] The New York Times reviews: "Twilight's premise is compelling and compelling—who hasn't dreamed of a supernatural romance with the beautiful stranger?"—but the book suffers at times.Amateur writing. A little more "performance" and much less "history" could have been a good thing, especially a little cripple to eliminate the constant references to the shocking beauty of Edward and eternal love Bella. Although later the Daily Telegraph, its 100 pounds, which defined the 1990s on Twilight, ranked 32th, he said the novel was "surprising, mainly due to [Meyer]' incompetence in prose."
