## The house of da vinci 2 walkthrough chapter 5

Chapter 5, not receiving the key In Chapter 5, after entering all the vials, I can't open the top. The mouse shows a hand as if something can be moved, but nothing works. This is my second track. He had the same problems on the first, but rebooting the game solved then. Now, trying to make speed of racing, nothing seems to work. This is very annoying! 29 Mar @ 11:24pm General discussion ruined game, from the freezin and crash of my pc once I reach the blue screen training chapter 3 times now, constant freezing does not want to play anymore, bad enough never finished game 1 because of bug this is worse and no response from developers 28 Nov, 2020 @ 10:25am General Discussions need Vsync! I checked the framerate and ran at 90+ fps. Extra frames (and therefore extra work and heat accumulation) are not necessary in a game like this. I also tried to pass Vsync through the Nvidia control panel and this has no effect. So, apparently, the game itself needs a Vsync game. Please add this.! 13 Mar @ 7:03pm General Discussion 1 person found this helpful review 0 Published: 21 May a very interesting puzzle game with a deep lore ... cool mechanical puzzle and some. You're good at pulling out your hair. Finished the game twice and I really enjoyed the second game. I look forward to seeing where the 3d game will take us on our journey! a strong 9/10 from me 575 products in consideration Nobody rated this review as useful but 0 Published: 27 May The game is amasterpiece. Let me start by saying the first game was a mess. The puzzles had obvious rules, but they took the time to solve because of the size of the cut (the worst). That's enough. Now you just have to understand the rules, which pieces move, how they move and what is the final state of the puzzle. Once everything clicks for you, solving the puzzle itself is a breeze. After that it moves to the next that works on totally different rules. This is the best type of puzzle, they are difficult to do, but a real joy to solve. And all this is accompanied by a fantastic animation. Looking at the mechanisms in action makes a real sense of wonder shine. It makes you want to have something like playing with in real life. The House of Da Vinci 2. Skip the first game though. 136 products in account Nobody rated this review as useful but 0 Published: 26 May My feelings about this game are mixed. Overall I liked what I played and was intrigued by the new mechanics and ideas brought to this game after the first. On the other hand the level drags beyond the enjoyment sometimes and some puzzles are at points a bit meh. Also some problems from the first game still dwell (some glitchy movements and some puzzles not fully explained) But even then I would still like to give this a shot and hope that the third in this series can build on these first two games 631 products in consideration Minimo: Requires a 64-bit processor and OS operating system: Windows 10Processor: Intel Core i5Memory: 8 GB RAMGrafica: Nvidia GeForce GTX 970 DirectX: Version 10Storage: Minimum: Requires a 64-bit processor and OS: macOS SierraProcessor: 2.0 GHz Dual Core ProcessorMemory: 2 GB RAMGrafica: Video card with 512MB of VRAMStorage: 4 GB available space Recommended: Requires a 64-bit processor and operating system Edit Sharing The Community content is available under CC-BY-SA unless otherwise specified. 4000 96.00% (42.1) Finish the second chapter. 4,000 84.00% (43.7) Finish the fourth chapter. 4000 64.00% (47.0) Finish the third chapter. 4000 64.00% (47.0) End the fifth chapter. 4000 60.00% (49.7) Finish the final chapter. 4000 56.00% (62.2) Finish the Rubik minigame in the final chapter. 2500 60.00% (49.7) Drawing the mysterious invention in Leonardo's secret laboratory in the third chapter. 2500 68.00% (45.3) 2500 84.00% (43.7) Bring the key to the sanctum of the secret library in the final chapter. 2500 56.00% (62.2) Finish the shell minigame in the third chapter of the first attempt. 2500 72.00% (44.5) Have five items in your inventory at the same time. 4000 20.00% (109.6) Finish the minigame in the book in the abate chamber in the fifth chapter on the first test. 2500 12.00% (273.6)all the sketches in your diary in all chapters. 4000 48.00% (87.8) Complete the game in less than 10 hours. 2500 52.00% (84.7) Finish the game in less than 4 hours. 4000 16.00% (128.6) Finish the game in less than 7 hours. 4000 32.00% (97.9) Finish the mini-game of elevator controls in the fourth chapter without using Oculus. 4000 16.00% (128.6) the house of da vinci 2 chapter 5 walkthrough guide
