Wifi password sharing iphone not working. How to fix wifi sharing on iphone. Why my iphone isn't connecting to wifi. What to do if wifi sharing doesn't work. Wifi not working on my iphone but working on other devices. Sharing via wifi vlc iphone not working.

Learn how to share your Wi-Fi password with friends and family. Make sure both devices are running the latest version of iOS, iPadOS, macOS High Sierra or later. Turn on Wi-Fi and Bluetooth on both devices. If Personal Hotspot is enabled on any device, turn it off. Sign in to iCloud with your Apple ID. Next, make sure the email address you use for your Apple ID is saved in the other person's contact list. And be sure to save their email address in your contacts. Keep the other person's device nearby, within Bluetooth and Wi-Fi range. Make sure the device (the one with the password) is unlocked and connected to a Wi-Fi network. On the device you want to connect to, select the Wi-Fi network. On your device, tap Share password, then tap Done. If you still can't share your Wi-Fi password, follow these steps and check after each step: If you don't see the setup animation, restart both devices and try again. If you still can't share your Wi-Fi password, ask the other person to enter the password manually. Starting with iOS 11, Apple has made it easier to share Wi-Fi passwords between iPhones, iPads, and Macs. You can wirelessly transfer your Wi-Fi password from your iPhone to another iPhone, iPad, or any Mac running macOS Sierra or later. It allows your friends and family to connect to your Wi-Fi network without manually entering a password. However, several users have reported that Wi-Fi password sharing on iPhone is not working properly. Below are some common problems. When I try to share my Wi-Fi password, I get an error message: "Password not shared. There was a problem transmitting your Wi-Fi password." The Wi-Fi password exchange pop-up won't appear. I click the "Share password" button, but nothing happens. Don't worry. In this article, we will share with you 11 quick tips to fix iPhone not sharing Wi-Fi password Part 1: How to Fix iPhone Won't Share Wi-Fi Passwords Tip 1: Turn on Wi-Fi and Bluetooth on both devices to share Wi-Fi password with friends and family, both devices must have Wi-Fi and Bluetooth turned on. If you are unable to share the Wi-Fi password on your iPhone, check these settings first and make sure they are turned on. On your iPhone or iPad, go to Settings > Wi-Fi or Bluetooth. On your Mac, click the Wi-Fi icon, and select "Turn on Wi-Fi" if it's off. Also, click the Bluetooth status icon to turn it on. Personal Hotspot should be turned off on both devices if it's turned on. Tip 2: Restart both devices and Wi-Fi router. occurred on the device. This can give your iPhone a fresh start and then fix minor software glitches. You can also try restarting your router to fix Wi-Fi related issues. Here's how: Restart your iPhone: Press and hold the power button (iPhones without Face ID) or the side button and either volume button (iPhones with Face ID) simultaneously until you see "Turn on slide." off". Swipe from left to right to turn off the iPhone. Wait 15 seconds, then hold down the power button or side button again to turn on the device. Restart the Wi-Fi router: You can disconnect the Wi-Fi router from the power source for about 10 seconds, then reconnect iPhone to Wi-Fi and try password sharing again Tip 3: Make sure both devices are up to date Apple enabled Wi-Fi password sharing with the release of iOS 11. This means Wi-Fi password sharing Fi can only work on iPhones, iPads with iOS 11 or later, and Macs with macOS High Sierra or later, in other words, both devices you want to share your Wi-Fi password with must be updated. Go to Settings > General > Software Update to check if iOS is up to date. If there is a new file to update, click Download and Install. On a Mac, click the Apple logo in the upper-left corner and go to About This Mac > Software Update. If a macOS update is available, click Update.4. Turn Wi-Fi off and on again. If the iPhone's Wi-Fi password sharing feature isn't working, another easy fix is to turn Wi-Fi off and then turn it back on. You can swipe up from the bottom of the home screen to turn Wi-Fi off and on in Control Panel, or go to Settings > Wi-Fi to turn Wi-Fi off and on again. This problem can also cause iPhone Wi-Fi password sharing not to work smoothly. Therefore, forgetting and rejoining the network can be an effective solution to the problem. Go to Settings > Wi-Fi, find the network name and click the "i" icon to the right of the network name. Then tap Forget this network on the screen. After that, you need to reconnect to the Wi-Fi network by re-entering the password. Tip 6: Make sure both devices are close to each other. The devices are too far apart. In this situation, just hold the two iDevices you want to share your Wi-Fi password with next to each other and make sure they are within Bluetooth and Wi-Fi range. Tip 7: Sign in to iCloud with your Apple ID. Fi password if you are not signed in to iCloud with your Apple ID. Open the Settings app and make sure you're signed in with your Apple ID. If not, click Sign in to your iPhone and enter your Apple ID and password. Tip 8: Add each other to your contacts. You also need to make sure your Apple ID email address is saved in the other device's contacts before sharing Wi-Fi. -Fi password. Also, make sure the recipient's Apple ID email address is saved in your contacts. Here's how. Open the Contacts app and find the person you want to share your Wi-Fi password with. Click Edit > Add Email Address to add the person's Apple ID email address. Then click Done to save the updates. Tip 9: Reset network settings. Try this option if the above methods don't work. Network settings reset changeswifi password problem Before proceeding, keep in mind that all Wi-Fi passwords, Bluetooth, VPN and other settings will be removed from your device. You must reconnect to the Wi-Fi network and enter the password. Launch "Settings" on your iPhone and tap "General". Click Reset and select Reset network settings. Enter your iPhone passcode and confirm in the pop-up window. This step should help you resolve various Wi-Fi issues including iPhone won't share Wi-Fi password. time.
