Android splash screen sample. Use of splash screen in android. Make splash screen android. What is the splash screen in android.

Hello guys, in this tutorial we will talk about "Splash Screen" on Android and have a closer look on how to implement it in a very simplest way. So, A splash screen is the first screen on most mobile Apps when it is opened. it's used to display some basic information about the app, like a logo, company name, etc just before it loads completely. To continue with this tutorial, make sure you have basic knowledge using Android Studio and Also Java language. Let get Started @ First start a new Android Project by going to File > New project or just tap the Create New Project button on the start page of your Android Studio. Choose Empty Activity as your project template, then click next. Give any name to your project, in my case i just set it to Splash Screen for this tutorial. and then click finish and wait until the project build successfully. To make this project more fun, we will create two activities, one for the splash and the other one for a MainActivity where the App should go after displaying the splash screen. So as you created your project successfully, Android Studio generate automatically a MainActivity with its layout containing only a TextView that displays "Hello World" in the center of the screen. we don't have to care about that, but in my case i will just change the Text to "Welcome home". android:layout_width="wrap content" android:layout_height="wrap content" android:text="Welcome Home !" app:layout_constraintBottom_toBottomOf="parent" app:layout_constraintLeft_toLeftOf="parent" app:layout_constraintRight_toRightOf="parent" app:layout_constraintTop_toTopOf="parent" Now, let create our Splash Activity with a logo in the center of the screen. Go to File > New > Activity > Empty Activity and give your Activity a Name like mine SplashActivity, you can give it any name, but just to be more simple. Enable Launcher Activity to make this as the starting Activity of our App, and click finish So we need to fix some things in AndroidManifest.xml file, to have only one Launcher Activity android:allowBackup="true" android:icon="@mipmap/ic_launcher" android:label="@string/app_name" android:roundIcon="@mipmap/ic_launcher_round" android:supportRtl="true" android:theme="@style/Theme.SplashScreen"> it must look like this. One more thing is to have an App Theme that don't have an ActionBar, change this line in your style.xml or themes.xml (AS 4.1) with Matera Design (AS 4.1) activity -> empty activity Give an activity name. example - ClassActivity Select package name and type the package name of your android application. Click on finish. 8.To modify the welcome screen Select - activity_home.xml 9.Change "hello world!" to "welcome screen!" and then change the text size to 40sp. 10.Adding a background color. Example - black 11.Go to activity_home tab. Type - android:text= "second / Home activity started" 12.Now to bring it to the center. 13.Allow the screen to load. 14.The activity is displayed after 5 seconds.
