I can find the widget in the widget drawer and as you said I am getting an error called 'launch system keeps stop' after dragging it to the home screen. I searched a little and many reports of Xiaomi phones have constant problems with widgets. In many cases it is linked to the settings of Or Miui authorization. This is an example of a possible solution. Are you using the launcher or personalized warehouse? Do you have the app drawer enabled? 2020/05/05 21:14 as 1 1 Hey I found the solution. I tried the "clear cache data and the force stop" but it didn't work. You guys are correct ... there were many similar problems with widgets in Xiaomi phones. I did some complicated work. Enable the fingerprint unlocks in whatsapp Privacy settings and then test the same procedure. Now the widget can be dragged into the main screen and it works !!!! If you want, then deactivate the unlocking fingerprint later. I hope this will be useful to someone in the future and thank you VVERY many guys for your support. Welcome a lot !!!!! Excellent! I'm glad you managed to find the solution and thank you for sharing it with us. It will be very useful for other users with a similar problem. But for me I did everything, even more times until I disabled to connect to my Whatsapp account for a while .. due to uninstalling and recording a lot of times. But my phone model is Sony Xperia XZ Premium, so I don't have fingerprints on my WhatsApp. Only on my phone block. Does any advice? Thanks in advance. 05-09-2020 01:34 It likes 0 Hey guys.
