These files can contain graphics, text, video and audio. If you want to use only the audio part of a Flash file, use the conversion software to extract the sound and convert it to MP3. This is useful if you have no more original access to the original for a file you've created, or if you want to listen to audio while you're on the go. Use the free file conversion offered on FreeFileConvert.com. Upload a file from your computer or enter the URL of the file you want to convert and select "MP3" as the desired output format. The converted file is displayed on the results page with the download instructions. This site does not require registration. Convert your SWF file to MP3 and deliver it to your inbox using YouConvertIt.com free service. Enter your email address and load the Flash file you want to convert to MP3. This site allows you to convert up to five files simultaneously. Visit Media-Convert.com to convert a SWF file from your computer or the web. Upload or enter the URL of your file and select "Flash SWF" as the input format. Select "MPEG-1/2 Audio Layer 3" from the second menu next to "Output Format" and click "OK" to create an MP3 version of the file. What should you do when you don't need to watch a video, but you just need to listen to the audio? In such cases, you want the portability and storage offered in an MP3. We will show you how to easily convert an MP4 video file to an MP3. There are a variety of free file converters that you can use directly in your browser or download to your desktop. Read on to know our favorites and our simple instructions on how to convert MP4 files using these free tools. Step 1: Switch to CloudConvert The CloudConvert homepage is the best place to get started. CloudConvert is an intuitive cloud-based service that offers a standalone option that requires little more than an internet connection and your file. It's completely free, doesn't require any additional software to run, and supports more than 200 formats á especially in our case, MP4 to MP3. While the resulting audio quality is great, as well as the conversion speed, a free account only allows up to 25 free conversions per day. However, CloudConvert should meet your needs if your only need to convert a few, small files per day. Step 2: Select the files you want to convert screenshots Click the Select File button in the center of the page and select the video files you want to convert to MP3. If you click the Drop Down Arrow icon to the right of Select File, you can also select a file from a URL or from Dropbox, Google Drive or OneDrive. Please note that you will need to access your cloud storage account through the CloudConvert site to access your cloud storage files. This way you can automatically create a free CloudConvert account. Once you have selected the files, click the Open button in the bottom right corner of the Pop-up to add files to the conversion queue. Step 3: Choose the Output Screenshot format Click the Drop Down Arrow button that is displayed after loading the MP4 file, then select Audio followed by MP3 from the drop-down list. descent. the Wrench icon located directly next to the file if you want to optimize audio bit rate, audio Qscale, volume or length. The latter is an incredibly useful tool if your video has an introduction or an end with unwanted audio. When finished, click the red button Ok. Step 4: Start the conversion screenshot Click the Red Convert button on the right side of the page when you have finished setting your desired output preferences. A grey-and-yellow bar indicating the current status of the conversion will be displayed, along with a delete button (a red X next to the grey-and-yellow bar) if you change your mind for any reason. Afterwards, wait for the conversion to be completed. Step 5: Download your new MP3 screenshot It may take a while, but CloudConvert will notify you when your conversion is finished. (A preview of your MP3 track can play automatically so you can hear it before you decide to download it.) Then just click the Green Download button to save it to your computer. Now that you've ripped your audio, you need a decent MP3 player to play on. These are our favorites. Alternative: Any Video Converter (Windows and MacOS) you can use our favorite video converter, Any Video Converter, if you want to convert files on your computer. Using this converter, users can convert MP4 audio to a variety of formats, including the highly portable MP3 format. This converter is our best choice because of its high speeds, good video and audio quality, and its wide range of supported devices. AVC also offers advanced options, including cropping and cropping audio files or stratification of different files. The AVC website offers a free edition of the software Any Video Converter which you can download directly. You can start the download process with a simple click of the Download button.
